

## UKRAINE CRISIS EXPOSES WEAKNESS IN HUMANITARIAN LOGISTICS

As governments, international aid organizations and the private sector rush to get critical supplies to the more than 5 million Ukrainian refugees and 10 million displaced by the war, cracks in the humanitarian supply chain have become chasms.

The trelyz **Logistics Hub** connects organizations with supplies to organizations that need supplies, allowing freight and logistics companies who move goods to offer transportation. Donating organizations can be private companies, international aid organizations or government entities. trelyz has created an open **coalition** of partners to scale the solution and improve the delivery of aid through our globally available, cloud-hosted platform.

For the first time ever, all of these organizations can work together - in one place - to deliver aid in a crisis. Government, private sector and nonprofit partners can work together with visibility, accountability, efficiency, impact, and speed.

### For organizations requesting supplies – recipients

**Easy** to specify needs | **Vetted** network of suppliers | **Secure** location delivery options | **Share** needs with others

### For organizations offering supplies – donors

**Vetted** recipients | **Easy** to configure donations | **Large** network of logistics providers | **Transparency** and tracking

### For logistics – freight forwarders

**Speed help** to those who need it now | **Fill** spare capacity | **Expand** network | **Help** deliver humanitarian aid

### A single, real-time central repository - multi-agency/entity access and simple interface

- Share information about supplies offered and requested with your own network and/or all participating organizations
- Manage and view your own needs and offers of goods and supplies by type and location - anywhere in the world
- Respond to requests or offers in real-time and secure transport through a network of thousands of logistics companies
- Reduce duplication of offers and requests in your organization and region through cross-agency and entity visibility
- Gather and analyze data in real-time for better accountability, transparency, and impact reporting
- Get the right supplies to the right organization, at the right place, at the right time

trelyz created the **RefAid App** for refugees in 2016 and has 8,000 organizations in 41 countries using the platform to offer aid to refugees, migrants and those who are internally displaced. RefAid was the 2021 winner of the Padre Arrupe Humanitarian Award. trelyz created this open coalition of partners to make its solution available to improve the delivery of humanitarian aid and disaster relief anywhere it's needed.

**We need donors of goods and supplies for the Ukrainian crisis**
